

**Title goes here. The first word and proper names in uppercase.
Genus/Species in Italics. 14 pt Times New Roman font in bold.**

First author full name (this is 11 pt Times New Roman font)
Second author full name (this is 11 pt Times New Roman font)
Third author full name (this is 11 pt Times New Roman font)
Additional author full name as needed

*First author affiliation, please see below for further instructions**
Second author affiliation, this is 10 pt Times New Roman font, italics
Additional affiliations

Abstract text goes here. Please see the example on the next page for further instructions. All extended abstracts must be submitted electronically. For abstract submission, we require the following formats: - --

- Microsoft Word;
- Margins: Left and right 1 inch.
- Heading Text: Left justified 12 pt. bold Times New Roman with one space above but not below.
- Subheading text: 11 pt. bold Times New Roman;
- Body Text: 11 pt. Times New Roman single-spaced.
- References at end: Times New Roman 10 pt.

Background (heading – 12 pt, left)

This is the section that provides background.

How to deal with figures (subheading (11 pt bold, in paragraph)). Figures (and photos as figures): Please include figures within the text as high resolution JPG or TIFF format (maximum size of each figure is 1 Mb) - no other formats will be accepted (i.e. embedded Excel graphs, illustrator, or PDF). Do not use bold or underline to try to emphasize important points. Do not use exclamation points more than once in your entire contribution.

This is 11 pt Times New Roman font.

Introduction

Feel free to make this an extended abstract that might include a couple of important figures (Figure 1) and tables. Abstracts can be several pages, at the same time we recognize work might be progress and a shorter abstract is appropriate. References are fine; please follow a common referencing format consistently (Gravity et al., 2015; Water and Particle, 2016).

Handling figures. Please insert figures as a single image, followed by (but not a part of) the figure caption. The figure and the caption should be left justified as in the example below (Figure 1), the caption appears below the figure. Tables are also left justified, but the table description should appear above the table. Colour figures will appear online, print version will be grayscale, please ensure the material is readable in both formats. If more than one figure is included, refer to the figure in the text, then present it below that paragraph. Figures should be numbered and appear in the order that they are introduced (e.g., Figure 1, then Figure 2 etc. – same for tables).

Figure 1: The average of three global temperature data sets 1850-2016.
