

## Physics 110 Reflection #2

Please feel free to type or hand write your responses. Please don't tell me what you think I want to hear, rather be honest in your assessments, observations, and thoughts. Please, refrain from sweeping generalizations or unsupported statements and base your answers on your own experiences and observations. I expect you to spend between 15-20 minutes per week answering the questions below and to focus on explaining your thoughts.

Name:

1. Thinking about the classes this week, briefly summarize the main idea(s) presented over the course of the entire week.
2. Thinking about the classes this week, what topic area(s) were clear? What made them clear or easy to follow? What topic area(s) were unclear? What made them unclear or difficult to follow?
3. Did you do the reading and take your own notes? If you did, did this help with understanding the week's material? If you did not, do you think it would have?
4. Did you have any difficulties doing the homework? If so, what were the difficulties and which problem(s) were difficult to do?
5. How much time did you spend on the homework problems this week? How does this compare to last week? Do you feel that that's a reasonable amount of time? Why or why not?
6. Did you attend a physics help center session? If you did, was it helpful? If not, why not?
7. Did you attend office hours? Why or why not? Were they helpful or not?
8. Did you use any online sources or watch any physics related videos to understand the week's content or to do the homework? If yes, did they help you understand the material? Why or why not?
9. Were the in-class problems representative of the lecture material? Of the homework? Explain why or why not.
