Physics 110 Reflection #7

Please feel free to type or hand write your responses. Please don't tell me what you think I want to hear, rather be honest in your assessments, observations, and thoughts. Please, refrain from sweeping generalizations or unsupported statements and base your answers on your own experiences and observations. I expect you to spend between 15-20 minutes per week answering the questions below and to focus on explaining your thoughts.

Name:

1. Thinking about the classes this week, briefly summarize the main idea(s) presented over the course of the entire week and explain what topics were or were not clear.
2. Did you have any difficulties doing the homework? If so, what were the difficulties and which problem(s) were difficult to do?
3. Have you started preparing for the upcoming exam? If so, in what ways and when did you start. How do you decide when you have studied enough?
4. Will you be preparing for this exam the same way you have for the last exam or will you be trying anything different? If you plan on something different, what are you planning?
5. Of the topics that we've covered so far are there any that have sparked your curiosity? If wo, what are they? Of those that have sparked a curiosity, have you look deeper into any of those topics?
6. Are there any topics or areas of mechanics that you would perhaps like to know more about?
7. Are there any topics or areas of mechanics that you are interested in the physics behind?
8. What is something that I, as the instructor, could potentially do to better support you and your learning in the last few weeks of the course? Explain.
