

## Physics 120 Reflection/Survey #3

Please feel free to type or hand write your responses. Please don't tell me what you think I want to hear, rather be honest in your assessments, observations, and thoughts. Please, refrain from sweeping generalizations or unsupported statements and base your answers on your own experiences and observations. I expect you to spend between 15-20 minutes per week answering the questions below and to focus on explaining your thoughts.

Name:

1. Thinking about the classes this week, briefly summarize the main idea(s) presented over the course of the entire week.
2. Thinking about the classes this week, what topic area(s) were clear? What made them clear or easy to follow? What topic area(s) were unclear? What made them unclear or difficult to follow?
3. Did you have any difficulties doing the homework? If so, what were the difficulties and which problem(s) were difficult to do?
4. How much time did you spend on the homework problems this week? How does this compare to last week? Do you feel that that's a reasonable amount of time? Why or why not?
5. Did you attend a physics help center session? If you did, was it helpful? If not, why was it not?
6. If you did not or have not attended a physics help center session, comment on any reason(s) why you haven't.
7. Did you have any issues with completing the lab that was due for the week. If yes, what were the issues?
8. Did you seek out any help to complete the lab. If yes, who, where, or what did you do to get help with completing the lab and were those sources helpful or not. Please explain.
9. Were you prepared for the exam this week? Explain why you think you were or were not.
10. What things did you do to prepare for the exam this week?
11. What did you think of the exam. Was it representative of the topics covered in the last three weeks in the readings, in the homework, the in class problems, or any combination of the three? If it was not, please provide an example or examples of where or why it was not.
